I have a B.Sc. in Computing for Business from Dublin City University.

IT Skills & Projects

IT Skills

Operating Systems:	Linux, Linux Shell, Windows
Front-end Development:	HTML, Django, CSS
Languages:	JavaScript, Python
Databases:	MYSQL

IT Projects Completed

1. Designed a multi-paged website made using HTML, CSS, and JavaScript which gives users information about the League of Ireland football league. This website has over 10 usable pages that includes information about every single club in the Irish Premier Division.
2. Developed a Python based application that rates a football players season from 0 to 10. It works where two inputs being games played, and goals scored and uses an algorithm we developed to give a rating.
3. Built my own physical desktop computer from scratch as well as helping friends build their computers. Helped upgrade different components in a PC such as the CPU, Power Supply, DDR4 RAM and an HDD to SSD storage device.
4. Built an app for my final year project called ScorVault which is about logging games attended in the GAA. Involving development using Django, Python, HTML, CSS, React Native.
5. Scored excellently in modules such as Programming, Web Design, Databases, Computer Hardware, Machine Learning, UI/UX Design & Implementation and many others over my 4 years of study in DCU.

Work Experience

Gym Plus
